Who is Saski?

"Hi! Just call me Sas^^. I'm 18 but turning 19 soon. Currently surviving Information Systems at Universitas Internasional Batam. I'm super into multimedia, basically just a girl who loves creating fun, colorful, and cheerful designs.

Well, to be honest, I'm also beyond excited about the idea of traveling the world and collecting all those pretty memories. All while growing into the best version of myself along the way. Hoping to keep leveling up my skills and creating visuals that don't just look good, but also bring 100% happy vibes to everyone!"
